

Established Italian Supplier to Represent Express Imaging Systems, LLC and PhotolIntel Group Europe

Seattle, WA June 7, 2007 -- Express Imaging Systems, LLC (EIS) and the PhotolIntel Group Europe (PhotolIntel) jointly announce the addition of Giovanni Morini and Astech SNC, Italy to a rapidly growing group of international partners and distributors representing the award-winning Europa digital printer product line.

Giovanni Morini will work together with Marco Beretta, the Managing Director of Astech, to provide sales and support to EIS and PhotolIntel in Italy. EIS is a leading developer of digital imaging technologies, including the high speed Europa digital printer for wholesale photo labs, says EIS. PhotolIntel, a group of companies offering innovative solutions for the photo industry worldwide, has been their European Distributor since 2005.

"We at EIS are excited about the expansion of our sales force as the Europa printer line gains market acceptance. EIS recognizes the value behind such reputable local support as we welcome Astech SNC to the team," said Keith Miller, President and CEO of EIS. "We are delighted to have such experienced representation in Italy," says Derek Fieldhouse, Managing Director of PhotolIntel.

Giovanni Morini has over 25 years of experience with digital technology and the photographic and photofinishing industries. Founder of Cyber Elettronica SAS and head of Product Research and Development for Luminus Systems, Italy, he is an active partner with Astech SNC, supplying photofinishing solutions to the Italian market. Marco Beretta, is the Managing Director of Astech SNC, a company that has lead automation in the wholesale lab for over 25 years with products such as, reorder tables, scanners, and envelope printer quality check control tables.

EIS has successfully installed Europa printers throughout the US and Europe, including placements in the US, UK, France, Germany and Spain.

About Express Imaging Systems

Express Imaging Systems (www.express-imaging.com) enjoys a reputation as a manufacturer of innovative high speed digital printers, digital film scanners and software for photofinishing operations. Our 125 years of collective experience in photofinishing provides reliable throughput and un-paralleled image quality and has recently pioneered the new HD Print™ for consumers to access high-definition quality on photographic paper, a move seen as an industry milestone in creating business growth for wholesale photofinishers. Our motto is "Twice the performance for half the cost." And when every cost is critical, why pay more for less when we offer the best.

About PhotolIntel

The PhotolIntel Group offers a range of innovative high quality photographic products on a worldwide basis. Combined with Nexus International in 1989, their mission is to provide the customer leading edge technology products to solve production and quality needs in the Photographic and Reprographic Industries.
