

## Express Workflow Solutions

PfDF compatible  
server, client, and  
workflow software.

### Import Drivers:

- integrate third party software
- customized for digital sources
- interpret available order data

### eGate Image Data Server:

- color enhancement and image sizing
- red eye reduction
- linear scalability to meet volume requirements

### Review Station:

- review images, flip, delete
- automatically or manually write batch work records
- assign and select multiple product outputs

### Express PfDF Client:

- integrate third party non-PfDF devices
- manually integrate hotfolders
- manage special products/batches

### Express Central PfDF Server:

- easy to maintain open architecture
- centralized order data database
- unify workflow

### Express Image Server:

- storage array for in-process orders
- maximize read/write times
- supports fast transfer rate protocols

### Export Drivers:

- interface to any device
- standard and customized drivers available
- automate special products/batches

### CD Server:

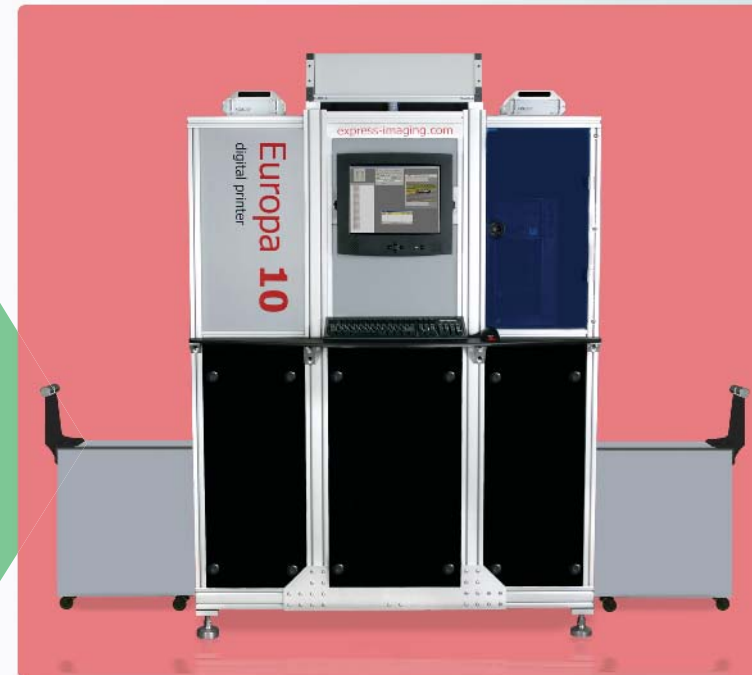

- customized cd formats
- supports up to 5 Rimage CD duplicators
- bundle multiple software products

### Index Print Formatter:

- create index prints during batch processing
- Europa option for printing index prints
- configurable stand-alone application

### Express Print Designer:

- compatible with the Europa printer
- incorporate text, logos and barcodes
- design frames and templates

## Europa Series high speed digital printer

The PfDF compatible Europa digital high speed printers set the standard for printing efficiency. With the recent advances in LED and LCD technology, the Europa 10 offers 450 ppi resolution on up to 5" paper with extraordinary reliability. The paper is exposed with an area-array method, which eliminates the need for complex paper transport systems to ensure precise paper positioning.

When pitted against other exposure systems, the Europa 10 took first place honors in the worldwide DIMA Printer Shootout competition. High quality prints with a greatly simplified paper transport system make the Europa 10 the clear choice as the centerpiece of the digital workflow for your lab.

## Europa 10 Features

- LED/LCD technology
- Water cooled for high throughput
- Crisp 450 ppi resolution
- Thermal Backprinter, 64 character
- Capacity when YOU need upgrade to 8" paper upgrade to 20,000 p/hr
- PfDF 4.2 enabled
- Standard Take-up and Supply Paper Cassettes
- 50,000 hour life lamphouse
